

WHERE A CHILD LIVES SHOULD NOT DETERMINE WHETHER THEY LIVE.

HEARTGIFT SAVES CHILDREN'S LIVES.

Every year, more than **one million children** are born with congenital heart defects. For most, the solution is simple: one surgery can save their life. But for **90%** of these children—living in places without access to specialized care—that life-saving treatment is out of reach.

HeartGift was created to change that.

We step in where the need is greatest and provide the one surgery these children need to survive and thrive.
